WOLNEY CESAR CARNEIRO

Senior Software Developer

São Paulo, SP, Brazil | wolney.dev@gmail.com | +55 (11) 95019-1471
linkedin.com/in/wolney-carneiro-10w | github.com/wolneydev

PROFESSIONAL SUMMARY

Senior Software Engineer with 9+ years of experience building, modernizing, and operating production systems, with a strong focus on backend engineering using PHP and Laravel. Experienced in RESTful APIs, software architecture, relational databases, CI/CD, automated testing, observability, and legacy modernization. Former Software Architect with hands-on experience defining engineering standards, leading technical initiatives, and improving development workflows. Experienced with AI-assisted development using Cursor, Claude Code, and personal MCP projects to accelerate delivery and improve code quality. Fluent in English.

TECHNICAL SKILLS

Backend: PHP, Laravel, RESTful APIs, Software Architecture Patterns, Monolithic Architecture, SOLID Principles, RabbitMQ (messaging PoCs), Legacy System Modernization
Databases: PostgreSQL, MySQL, SQL Server, Data Modeling, SQL Query Optimization
DevOps & Infrastructure: Docker, CI/CD, GitLab CI, GitHub Actions, Argo CD, AWS, Automated Deployments
Observability: Application Monitoring, Logging, Error Tracking, Alerting, Production Troubleshooting
Testing & Quality: PHPUnit, Unit Testing, Code Review, API Documentation (Swagger / OpenAPI)
Frontend: JavaScript, Angular, Vue.js, Bootstrap
Methodologies: Scrum, Kanban, Agile

AI-Driven Development Tooling:

- Hands-on experience with Cursor IDE, Claude Code (CLI/Agent), and advanced prompt engineering for code generation, refactoring, and automated code review.
- **MCP Server (Personal Project):** Built a custom MCP server in Laravel exposing specialized tools that provide an AI-driven alternative to traditional web forms, allowing frontend clients to handle platform registrations via conversational agents.
- **Autonomous Workflows & Productivity:** Implemented CLI and IDE agent workflows to streamline feature development, automate test execution, and accelerate repetitive coding tasks.

PROFESSIONAL EXPERIENCE

Senior Software Developer | Linuxell Informática

Mar 2024 – Mar 2026

- Maintained and evolved a large-scale government system serving Brazilian citizens, built with PHP (Laravel), Angular, PostgreSQL, and SQL Server.
- Implemented architectural improvements and delivered new features, improving system maintainability and reducing defects/incidents.
- Automated build, test, and deployment workflows with GitLab CI/CD and Argo CD, supporting frequent production deployments.
- Worked on applications hosted in AWS environments and collaborated with the DevOps team on deployment-related activities and environment issues.
- Wrote and maintained PHPUnit unit tests to prevent regressions and ensure application reliability.
- Collaborated with engineering teams to improve delivery workflows, code standards, and maintainability.

Stack: PHP, Laravel, Angular, PostgreSQL, SQL Server, MySQL, JavaScript, REST APIs, GitLab CI/CD, Argo CD, AWS, PHPUnit, Docker, Scrum, Kanban

Projects: A case management system for handling citizen service requests at a federal government agency, featuring workflow management, report generation, REST API integrations between systems, and support for the teams responsible for citizen services.

Software Architect (Mid-level) | Avansys Tecnologia

Sep 2019 – Apr 2024

- Defined software architecture and development standards adopted across two major projects, providing technical leadership to four engineers.
- Built reusable Laravel scaffolds that standardized project structure, automated application layers, accelerated development, and reduced release time by six months.
- Designed and maintained GitLab CI pipelines to automate build, testing, and deployment for four major applications.
- Developed SPA-based financial systems with Vue.js frontends and Laravel REST APIs; supported legacy platform modernization initiatives.

- Prototyped asynchronous service-to-service messaging with RabbitMQ, evaluating decoupling patterns for distributed architectures.
- Integrated enterprise systems through RESTful APIs and maintained API documentation with Swagger (OpenAPI).
- Implemented Redis-based caching to reduce database load and improve application performance in Laravel-based systems.
- Performed code reviews and resolved production issues, ensuring technical quality across teams.

Stack: PHP, Laravel, Vue.js, PostgreSQL, SQL Server, MySQL, Redis, JavaScript, REST APIs, GitLab CI, RabbitMQ, Swagger, Docker, Scrum, Kanban

Projects: CRM, financial platform, healthcare platform, and legal management system, contributing to the implementation of new features, integration between systems through REST APIs, modernization of legacy applications, and the continuous evolution of software solutions.

Systems Analyst | Companhia de Governança Eletrônica de Salvador

Jul 2016 – Sep 2019

(Through contracted service providers)

- Developed and maintained web systems for public sector institutions using PHP, JavaScript, jQuery, and Bootstrap.
- Delivered contract management and service desk systems used by two agencies.
- Integrated frontend applications with REST APIs and web services; maintained and migrated legacy systems.
- Optimized SQL queries on MySQL and SQL Server, improving web application performance.

Stack: PHP, JavaScript, jQuery, jQuery Mobile, Bootstrap, Apache, Cordova, REST APIs, Web Services, MySQL, SQL Server

Projects: Development and maintenance of public sector management systems, including solutions for public works management, inventory and workforce management for public lighting and monuments, administrative contract management, service desk (ticket management), and municipal event management.

EDUCATION

Bachelor of Information Systems — Faculdade Dom Pedro II
Postgraduate Certificate in Project Management — Wyden

CERTIFICATIONS & COURSES

- Certified Scrum Developer® (CSD) — Sep 2024
- Full Cycle: Hexagonal Architecture, Event Storming, RabbitMQ, Docker, Software Architecture Fundamentals, SOLID
- EspecializaTI: Laravel Microservices, API Gateway and RabbitMQ
- Udemy: Docker and Kubernetes: The Complete Guide; Complete React Course; Building RESTful APIs with Laravel
- Softblue: Java Web with JSF, PrimeFaces, and JPA

LANGUAGES

Portuguese — Native | **English** — Fluent
